GENINVO™

ApoGI™ as a Meta-Driven Platform

www.geninvo.com

North America | UK | Europe | India

The **Challenge**

Industry needs a platform to maintain Study Level Metadata to include all states (CDASH, SDTM, ADaM) usable for data submission.

Addressing the **Challenge**

ApoGI allows sponsors to store, retrieve, and manage organization metadata standard within this platform. Study consumes these standards during the build phase. Metadata is changeable within the study design and stored and managed at this level. They are further extended to all downstream functions and systems.

Outcome

ApoGI presents a MDR visualization module, which directly links to MDR and allows user to extract KPIs to monitor, increase productivity, and manage regulatory compliance.

ApoGI™

Apart from the Plug and Play offerings of our premium product **ApoGI™**, we also provide **Automation of Data Conversion** for CROs and Pharmaceutical Companies to avail Data and Document Anonymization services.
