KEY BENEFITS

Data + Document Anonymization
Shadow™ is a comprehensive solution to address the evolving landscape for data and/or document de-identification and anonymization

Risk Analysis
Determine the risk for re-identification of your data before and after de-identification to ensure you meet required thresholds

Real-Time Results
See the effects of your de-identification strategies as you apply them so that you can determine and tailor their effectiveness

Anonymization Reports
Reports to help drive, describe and monitor your anonymization projects and the effectiveness of your teams

Cutting Edge Solution
Built from the ground up by the Innovative Solutions team at GenInvo, a team comprised of Life Sciences, technologists, and software development experts

KEY FEATURES

- ✓ Data + Document Anonymization
- ✓ 21 CFR 11 and GDPR compliant
- ✓ Used for successful submissions to EMA (Policy 070), Health Canada, and others
- ✓ Auto-generation of anonymized datasets, documents and reports
- ✓ Risk Analysis to determine risk for re-identification of patients
- ✓ Data Utility to assess the impact of the anonymization to ensure the researcher's ability to reproduce analyses
- ✓ Dynamic Strategy Repository and recommendation engines to streamline anonymization processes
- ✓ Performance Metrics to evaluate the effectiveness and efficiency of your anonymization teams and process
- ✓ Process Workflows to guide users to successful outcomes based on past projects
- ✓ Realt-Time Results: ability to immediately view before/after results of anonymization techniques
- ✓ Automated by strategy repositories, workflows, and Machine Learning
- ✓ Inspired by innovation and fueled daily by the guided learning of users like you!
