GENINVO™

Datalution™

Intelligent Synthetic Data Platform for Transforming Clinical Trial Workflow

Product Highlights

- Intelligent Synthetic Data to Activate Downstream Analytics Before First-Patient-In
- Synthetic Data Infrastructure to Unlock Early Testing, Validation, and System Readiness
- Privacy-Guaranteed: Zero Patient Re-Identification Risk OR Built-In, Zero Re-Identification Risk by Design
- Accelerated Study Configuration and Early Programming Activation

GENINVO™

Synthetic Data Enables

- De-risking system validation and programming
- Validating reconciliation, coding, and cleaning processes
- Eliminating patient exposure risk
- Testing QTL programs
- Achieving time and cost efficiency
- Pre-building datasets, TLF shells, and analysis programs
- Conducting realistic UAT for EDC, IRT, ePRO, and vendor systems

GENINVO is the go-to partner for our life science industry delivering innovative software solutions and Data Science services.
We are focused on solving the toughest and most complex business problems and produce transformative solutions. Our unique combination of deep expertise in life sciences, leading edge technologies and software development, data-engineering practices, cloud expertise, and artificial intelligence research truly help bring life-changing treatments to patients faster
